FIELD OF VIEW - 23 mm Full Plan Field of View

10x/23mm PLAN EYEPIECES

Plan eyepieces with 23 mm field of view; high eye-point type, also suitable for the use of eyeglasses.

ZOOM OBJECTIVE

The High-Grade Zoom Objective grants a sharp and clear vision. With a zoom ratio of 6.72:1 it makes this series a perfect instrument for any application.

CLICK-STOP DETENTS

The zoom objective is equipped with a precise click-stop mechanism which makes easy to quickly find the default zoom positions: 0.67x, 0.80x, 1x, 1.2x, 1.5x, 2x, 2.5x, 3x, 3.5x, 4x, and 4.5x.

X-LED - Two Times Brighter Than Any Other

X-LED: A SEA OF LIGHT

Where present, both illuminators are equipped with X-LED systems:

- the incident illuminator with **X-LED³** (single LED, 3.6W)
- the transmitted illuminator with **X-LED^{T3}** (60 LEDs)

X-LED: RESPECTING COLORS

With 6,300K color temperature the samples are illuminated with the most natural light. It allows to respect their colors, without altering the nuances.

X-LED^{T3}: SIMPLY UNMATCHABLE

Top class illuminator for transmitted light. With 60 LEDs geometrically arranged, it grants a perfect light uniformity and the observation of large samples thanks to its 10cm diameter.

Multi-plug power supply

SZO Series

Greenough Optical System

The V-shape optical path of Greenough allows us to design a very compact and a slim unit, highly versatile and appreciated for the 3D viewing. Samples with significant depth can be quickly inspected. Binocular and trinocular heads are 45° inclined to grant comfortable posture to the user even after several hours of operation.

6.72:1 Zoom Ratio

SZO Series has 0.67x-4.5x zoom range (6.72:1 zoom ratio), being purposely designed for routine inspections. This zoom ratio enables most samples to be observed at the appropriate magnifications. When combined with proper accessories (2x additional lens and 25x eyepieces), SZO delivers excellent image quality up to 225x.

X-LED Exclusive Lighting Source

Special technology able to double the light intensity for incomparable performance, ensuring constant pure-white colour temperature.

Relevant money & energy saving thanks to the incredibly low energy consumptions allow you to cut the electricity bills by 90%! On SZO-3, SZO-4, SZO-5, SZO-6.

Stereozoom Microscopes For Laboratory & Industry

Overhanging Stand, In Case Of Large Samples

This stand is recommended for efficient, quick and precise observation and digital imaging of large samples, that cannot be processed with regular stands. Achieve 360° rotation and smooth movement with no limits, as the mechanism can be tilted from right to left, backward to forward. On SZO-7, SZO-8, SZO-9, SZO-10.

Large Working Distance And Field Of View Size Are Important!

If you need to work under the microscope, you will need a large working distance. SZO Series ensures an extended working distance of 110mm compared to the standard 100mm. Keep in my mind your application, always: if you are soldering a printed circuit board, it may be more important to have a long working distance; if you are counting items, then a large field of view will be of great assistance.

ST-111.1 - Moving stage

Moving stage ST-111.1 is a micrometer positioning stage with XY graduation of 0.01mm. Whenever you need to precisely move the sample or make measurements, this is the ideal solution. It works with both incident and transmitted illumination, and it is equipped with rotating stage and sample clips. It is suggested to use it in conjunction with the optional micrometer eyepieces.
